PERSONAL PROFILE

Full-Stack Web Developer with a solid foundation in Systems Administration and Networking. Experienced in Linux environments, Windows Server roles, and CCNA principles. Dedicated to continuous learning and focused on building secure, functional, and well-structured software solutions

SKILLS AND ABILITIES

- Web Dev: Laravel, PHP, MySQL, JavaScript (ES6, OOP, DOM, BOM) & React.js/TypeScript, HTML/CSS
- Programming: C# (Windows Forms, SQL Server SSMS) Fundamentals
- Systems & Networking: CCNA (Routing/Switching), Windows Server (ADDS, DNS, IIS), Linux (Debian/Ubuntu)
- Desktop & Tools: Git/Github, SQL Server, Cisco Packet Tracer, Vmware, AI Tools

EXPERIENCE

- Windows XP OS Simulator (Vanilla JS): A complex host environment for JS apps built with OOP/DOM/BOM, featuring a functional desktop and modular app.
- Frontend Web Templates (HTML5/CSS3): A series of modern, responsive business and agency templates developed with a focus on clean UI and simple jQuery.
- School Management System (Laravel 12): An academic & finance platform featuring multi-language support and complex student hierarchy using Polymorphic

- Invoices & Billing System (Laravel): Automated invoicing lifecycle with PDF printing, Spatie-based ACL, and optimized data handling via AJAX.
- Healthcare System (Laravel 12+ & React.JS/TypeScript): A multi-dashboard platform (**In-Development**) with real-time notifications, React.js/TypeScript/Inertia.js, and automated clinical workflows.
- Custom eCommerce CMS (Pure PHP): A secure MVC framework built from scratch featuring a Regex-based router, Repository pattern, and RESTful API.
- Moderation Management System (Procedural PHP): Multi-level approval system for members and products using MySQL/PDO and robust comment moderation logic.
- 3-Tier Accounting App (C# .NET): A desktop application for full financial cycles using 3-Tier Architecture, SQL stored procedures, and Crystal Reports.
- Network Infrastructure Labs (Cisco): Secure network designs implementing OSPF/EIGRP routing, VLAN segmentation, and robust security via ACLs and NAT/PAT.

EDUCATION

Technical Institute of Computer Science – Syrian Virtual University (**Last Term**) 2024-now

Aiming to bridge into the Bachelor of Information Technology (BAIT) program upon graduation

CERTIFICATION & TRAINING

- A+: Computer maintenance, OS installation, troubleshooting
- Financial accounting: with accounting software
- Fullstack Developer: Web Design & Web development
- Diploma in Programming & Algorithms: C++, C#, Java
- Diploma in Systems administration: CCNA & MSCA
- Course Security+: Youtube/Information Technology

LANGUAGE

- English: Good, Arabic: Native
